

MADISON SPENCER ARCHITECTS

Madison Spencer Architects seek talented and experienced registered architects and architectural designers. Compensation packages exceptional for those experienced with document production and project management at a residential scale with AutoCad and/ or Revit platforms. We are a design oriented firm with a broad array of projects located primarily on the eastern seaboard. While our firm is based in Charlottesville, we have directed work from Maine through the Carolinas and the Caribbean as well. We move seamlessly between preservation, restoration and new construction projects that are both large and small, urban and country.

MSA is an equal opportunity employer. Over the years our firm has been and continues to be happily diverse with designers and staff hailing from Europe, Asia, Africa and the Americas. We do not permit discrimination of any sort and foster a collegial environment in order to devise great designs for great clients.
