

Young, energetic and growing architecture firm seeks enthusiastic and hard-working team member. The firm is currently engaged in all phases of design on several residential, ground-up projects. As a young firm, we are completely open to new approaches; there is nothing dogmatic about the firm's work, creating a terrific opportunity for the exploration of original design ideas and professional design growth.

Candidates must have a minimum of a bachelor's degree in architecture and must be familiar with conventions of drawing and representation: digital, by-hand, and physical model. Duties will include preparing, assisting with and attending client presentations, drafting construction details, building digital and physical models, and everything in-between. Applicants with experience using AutoCAD, Rhino, Revit and the Adobe Creative Suite will be given preference, but the job is open to all candidates who demonstrate a commitment to innovative thinking and hard work, and who will be fun to work with.

Candidates who are interested in exposure to all parts of design and practice will find the job particularly rewarding, and there is enormous opportunity for growth and to assume project management responsibilities.

Competitive compensation with health benefits, holidays, and 15 days paid time off per year.

Please forward resumes, work samples, and a brief writing sample. The latter should, ideally, be something brief that was recently prepared during the course of architectural studies.
